# Programmer-Analyst

## Profile

Over 5 years in customer requirement analysis, web applications design and object oriented programming coupled with proficient skills in MySQL. Team player, flexible, attention to details and autonomous.

## Employment

2011 - Present

### GeoimageSolutions Programmer – Analyst

Throughout this period, my duty is to engage in database design and creation using references and client discussions, while participating in Web application interface design and HTML, CSS, JavaScript design and development. Added to this are backend application development and its modules, on the client side.

My role, further involves using the JasperReport software and indicators in SQL in the creation of specific modules for web applications and documents generated by the application. In a nutshell, I have willingly engaged in all phases of project development and in writing technical documents as well.

## Projects

2015 - Present

### RCCM-OHADA

Management system for the Trade and Personal Property Credit Register of the Organization for the Harmonisation of Business Law in Africa.

**Technologies:** Jasper soft Studio, Grails, Java, MySQL, Bootstrap

#### Developed modules:

- Involvement in the development of the management module of natural or legal entities.
- Creation of the list of model documents and dynamic official forms generated by the application.
- Using Bootgrid in the organization of all the web pages containing tables displaying a list of data in the application.

- Management of natural or legal entities.
- Management of cadastral information.
- Provision of technical documents.

## Education

2015 -2016

### Course Computer programmation and analysis

Université de sherbrooke - Canada

2006-2008

### Master Computer engineering

Université du Littoral Côte d'Opale – France

## Languages and Technologies

### Environment

Ubuntu 14.04, Windows 7

### P. object oriented

Java, C++

### Web applications design

HTML, CSS, JavaScript, JQuery, Ajax, AngularJs 1, NodeJs

### Data base

MySQL, PostgreSQL, MongoDB

### Framework

Grails

### Others

Eclipse mars, Apache Tomcat, Git, SVN, Jasper Report, Xmind.
